

1)

2) Ref 533

Describe human factors contributing the safety hazards.

3) Ref 532

Explain engineering design procedures in electrical installation safety.

4) Ref 531

Explain one minute safety audit procedure before entering the high risk site.

5) Ref 530

What are the steps required before the de-energization of electrical equipments?

6) Ref 529

What are the safety procedures?

7) Ref 528

Explain medium and high voltage safety procedures.

8) Ref 527

What are the hazards that can be caused by electronic equipments?

9) Ref 526

Explain the low voltage and the procedures to reduce the risk caused by low voltage.

10) Ref 525

Describe the risk reduction procedures.

11) Ref 524

Describe the risk analysis procedures?

12) Ref 523

What are the procedures to be followed in periodic maintenance?

13) Ref 522

Explain the electrical maintenance and safety procedures.

14) Ref 521

How will you prevent the hazards?

15) Ref 520

What are the hazards of electricity?
