

UETDRMP011 Testing of connections to low voltage electricity networks

Elements and Performance Criteria

ELEMENTS PERFORMANCE CRITERIA

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.		
1	Prepare to perform test procedures	1.1	Workplace requirements for perform testing of connections are identified and confirmed	Lesson 1 + Lesson 1 Assessment
		1.2	Hazards are identified, risks assessed, and control measures identified and applied	Lesson 2 + Lesson 2 Assessment
		1.3	Tools, equipment and personal protective equipment (PPE) required for testing are determined, obtained and confirmed in working order	Lesson 2 + Lesson 2 Assessment
2	Carry out test procedures	2.1	Hazard control measures are monitored in accordance with workplace requirements	Lesson 2 + Lesson 2 Assessment
		2.2	Use of tools, equipment and PPE for testing are carried out in accordance with workplace requirements	Lesson 2 + Lesson 2 Assessment
		2.3	Testing of connections to electricity networks are conducted in accordance with workplace requirements and AS4741	Lesson 2 + Lesson 2 Assessment
		2.4	Corrective actions are undertaken in accordance with workplace requirements	Lesson 2 + Lesson 2 Assessment

3	Complete the test procedures	3.1	Test results are recorded in accordance with workplace requirements	Lesson 3 + Lesson 3 Practical Assessment
